

SKINCARE SPECIALTY CLINIC

DERMATOLOGY CONSULTATION REPORT

Patient Information

Patient Name: Priya Nair
Age: 28 Years
Gender: Female
Date: 30-May-2026

Chief Complaint

Persistent itchy red rash over both forearms for 3 weeks.

Examination Findings

Erythematous scaly patches noted over bilateral forearms. No signs of infection.

Clinical Notes

Symptoms worsen after exposure to cosmetic products and detergents.

Assessment

Suspected allergic contact dermatitis.

Treatment Plan

Topical corticosteroid prescribed. Avoid suspected irritants and maintain skin hydration.

Follow-Up

Review after 2 weeks.
